## **dialectica**

I became involved with *dialectica* – a philosophy journal founded in 1947 by Bachelard, Bernays and Gonseth – in 1999, taking care of its day-to-day functioning, as well as the contact with authors and referees, and reading and evaluating (almost) every article. A year before *dialectica*'s long-time editor *Henri Lauener* died in 2002, I started collaborating with *Gianfranco Soldati*, appointed in 2000 to the University of Fribourg. Together, we managed to get *dialectica* published by Blackwell-Wiley and reduced the acceptance rate from over 20% to 9% (while the number of submissions tripled). I have continued to work as managing editor and co-editor with Pascal Engel and then Marcel Weber: during this period, the number of submissions doubled again, now ranging from 250 to 300 per year (cf. <http://dialectica.philosophie.ch>). *Dialectica* is now ranked "A" in the European Research Index of the Humanities and the Australian Research Council's ERA, is accessible to 5005 institutions worldwide and had about 38'264 full article downloads in 2017.

## **www.philosophie.ch**

In 2002, I created <http://www.philosophie.ch>, the Swiss Portal for everything related to philosophy. Its aim is to coordinate the activities of the Swiss philosophy departments (event calendar, newsletter), to offer services to the profession (job offers, preprint series) and to prospective students (study plan information, advice), and to further the contacts between philosophical academia and the broader public. The portal is now widely used (more than 12'500 visits per month, excluding robots et al) and generously funded, both by the philosophy departments and private institutions, mostly by the Charles Hummer foundation, having now a annual turnaround of about 150'000 CHF.
